I'm planning a 'department' river trip down the Green River thru
Desolation Canyon from June 7-10 (Saturday - Tuesday), leaving SLC
Friday evening about 6pm and returning Tuesday evening about 10pm.
You are cordially invited to come along. I expect the cost to be
about $75 per person (including transportation to/from SLC using
private cars; we'll have to co-ordinate transportation carefully to
minimize the number of drivers we'll need to fly from Green River back
to the put in.) Kayakers will pay about $60. At the moment the
size of the trip is limited by the number of boats available. I know
of two boats that are defintely available, probably three, holding
10 (2 boats) - 15 people (3 boats). I need a fairly quick indication
of interest so I can attempt to find more boats if needed.

One problem with these sort of trips is that they are complicated
by indecision and last minute changes, so please try to accurately
determine your interests. I expect to open this trip up to more
people in the Department after this initial round, but as the permit
is limited to 20 people, I'd like you to check with me before asking
others if they're interested, to make sure we don't overfill the trip.
(Of course spouses/close friends are invited initially!).

For those who don't know about Desolation Canyon, it's the section of
the Green River between Ouray (on US 40) and the town of Green River
(on I 70). We actually put in at Sand Wash, and run 85 miles downstream
to Swassey Rapid. The first day is fairly quiet, and while they're
not any 'boat eaters' on this trip, there are some good rapids. We'll
be running it at a good water level. Overall, it's a very good introduction
to white water rafting. Kayakers should have had some white water day trip
experience, but this is a good first multi-day trip for kayakers with
basic fundamentals in hand. All rafts will be paddled, so be prepared to
do your share. Trip price estimated above includes breakfast and dinner,
with lunches up to you. For comparison, a commercial river trip down
the same stretch of river would cost you $250 - $300 NOT including
transporation to/from SLC.

I'd appreciate an expression of interest asap, but please try to give me
as definite an answer as is possible.

    Randy

From: FRANK
Subject: Yampa and other river trips
To: lindstrom, kessler, lepreau, dronsowski, hunt

The Yampa trip is off, due to questionable interest and primarily the
fact that I have to be in town to do a dog and pony show for some
people from Burroughs.

So all is not lost, I'd like to plan on running the Snake river near
Jackson, Wy next weekend. This is a day trip with car camping. The
river is big (much bigger than the Green) and offers a good ride.
Plan on Sat. night in Jackson (good bars). I'm willing to offer my raft
if anyone want to raft. We need 4 rafters minimum, but the raft can hold
6 or 7 (since there's no gear on it)

Let mek now sour interests. We'll plan on runnins both Sat and Sunday, but if sou only want to so for one das that's fine. Cost should be minimal: sas to set up there plus food and drink.

From: LINDSTROM
Subject: desolation $ settlement
To: frank, hunt, dronsowski, lepreau, kessler, lindstrom

Here are the bottom lines. + indicates money due Overflow (check made out to G.L., please); - indicates an Overflow check will be forthcomins to sou. An itemized bill will be placed in sour mailbox.

Randy & Jonni	-60.28	(equipment will be separately reimbursed)
Francie	+59.78	
Paul	+69.78	
Jay	+49.44	(food credited to sou --- settle w/ Linda)
Linda	+69.78	
Bob & Julie	+114.24	
Gary & Sandy	-202.73	
	100.01	(retained earninss for Overflow)

Just remember: a commercial trip would have cost a bunch more, and not have developed sour muscles or comraderie nearlv as much.

Eddy!

In-Reply-To: Your messase of 13-Jun-80 1817-MDT

Count us in. My only concern is whether my bottom will be too sore to sit in one of the saddle barstools at the Cowboy Bar.

Name: Jay Lepreau
Birthdate: 3/27/52
Education: Haverford College, 70-71,73-74. Molecular biology.
Temple Univ., 75-76. Math & Comp. Sci.
Univ. of Utah, 79-present. BS in CS expected 12/80.

CS-type Employment:
Psych. Dept, Haverford College, Haverford, Pa.
1974-76. Programmer & Research ass't.

Biological Abstracts, Phila, Pa.
1976-77. Programmer/analyst, project leader.

Datacomp Corp, Phila, Pa.
1977-79. Systems software specialist.

EXPERIENCE
Projects include:
Screen editor, real-time experiment control system
(included modifications to IBM OS/360), complex text processing,
support psms for pre-photocomposition textual database,
relocating loader, "structured programming" macros
(if-then-else, while, etc) for RCA Spectra 70 assembler,
complete responsibility for the design, implementation, &
test of a disk file system. This last included linked blocks,
paramterized block splitting strategy, system catalog,
insert/update/delete/point operations, and semi-automatic recovery
via roll back/forward. Implemented in "structured" Spectra 70
assembler (all we had) in approx. 7000 lines. This system
currently is handling million-record files successfully
(telephone books) on extremely flaky Univac disk drives.

Languages:
Fluent - PL/1, Pascal, Fortran, Ratfor, Dynamo, 360/Spectra 70
assembler.
Fair - Rlisp, PDP-9 assembler, CSMP
Reading - PDP-11 assembler, C, Cobol, APL, Basic

Machines & Systems:
360/370 under OS/VS, PDP-8, PDP-9, DEC-20, Spectra/70
under DOS, IBM's CICS package, ADR's Roscoe.
